CDAC BUG-BOUNTY REPORT

Authentication, Access Control, and Privilege Management

Topic

Mounting the bootable kali linux pendrive in the hardware to get the access of Boss OS system

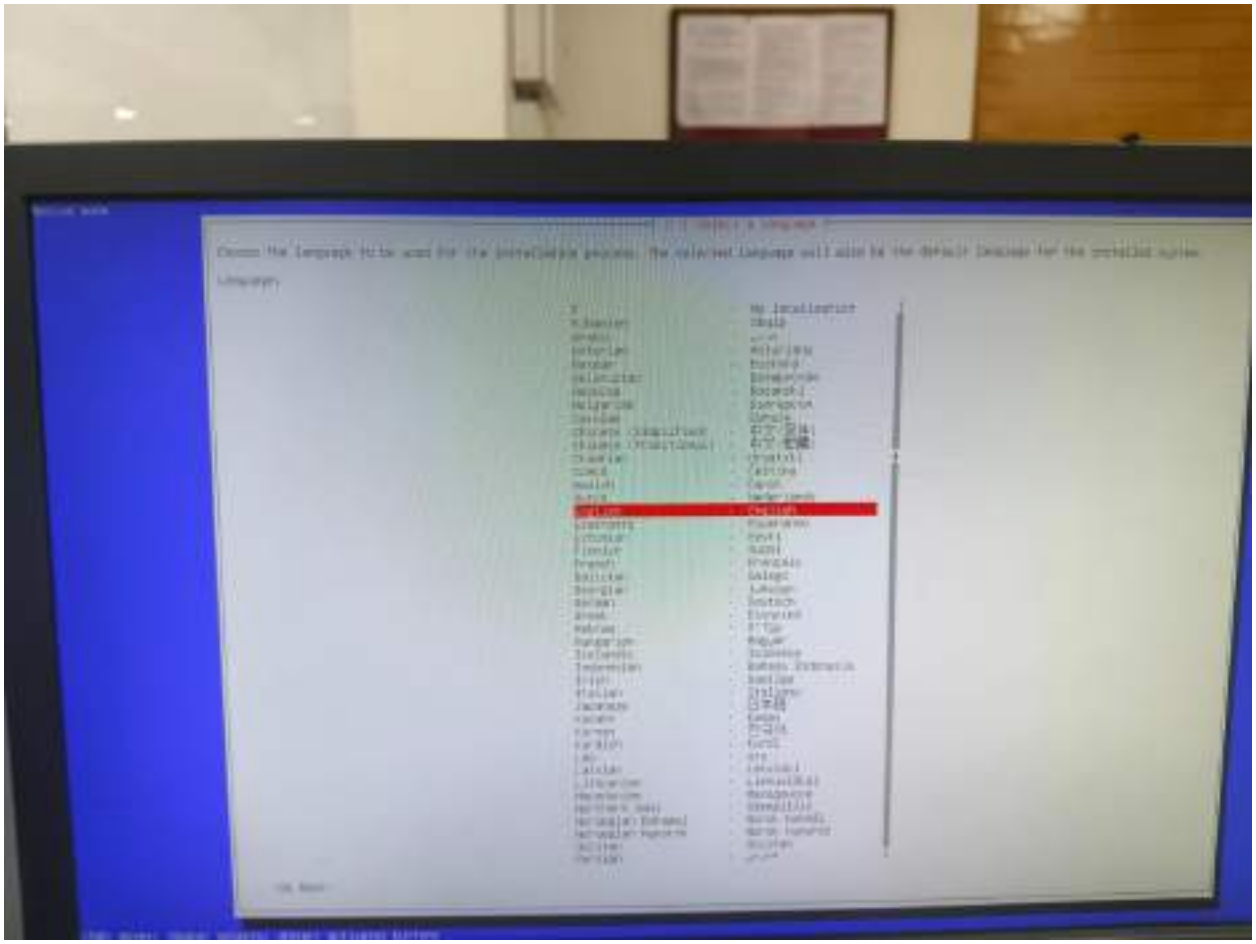

Step1 going into rescue mood of kali linux using Advance option in bootable pendrive

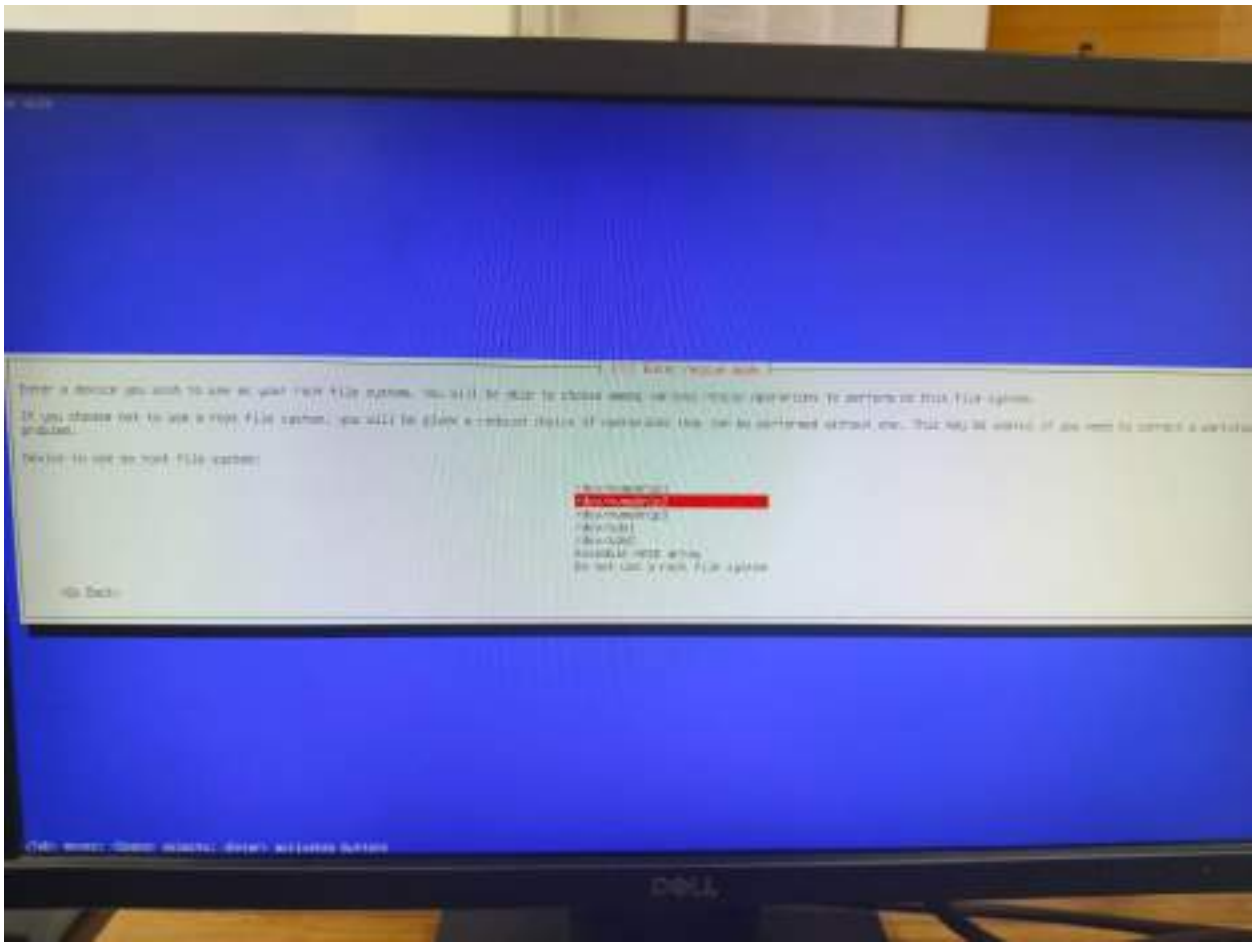

Step2 In Advance option go to the rescue mode

Step 3 Enter all the steps u do to setup just click ENTER SKIP until you enter the main rescue mode

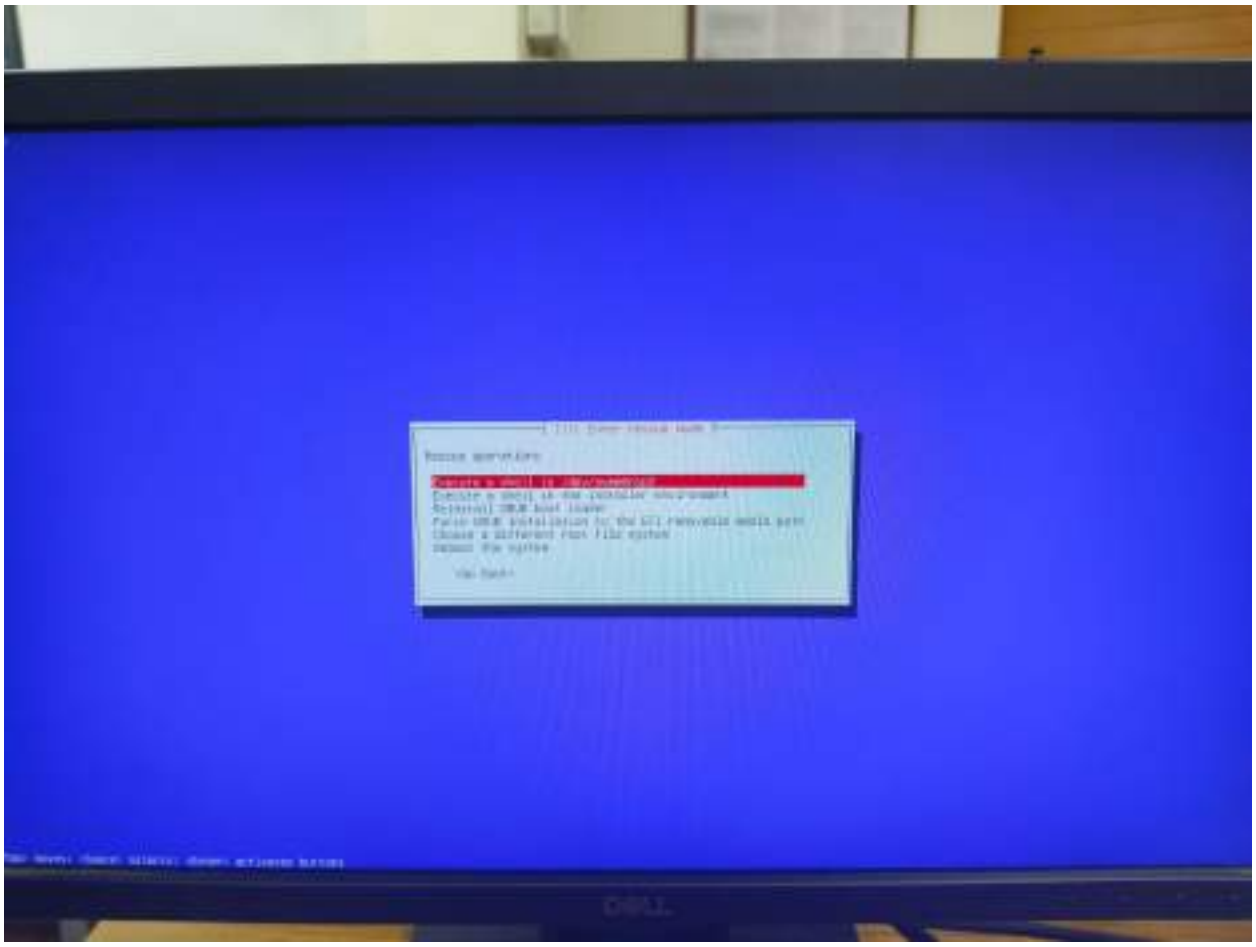

Step 4 you will see many option but choose only where the boss partition is there we will select which device to use root file system .

On our system we will select

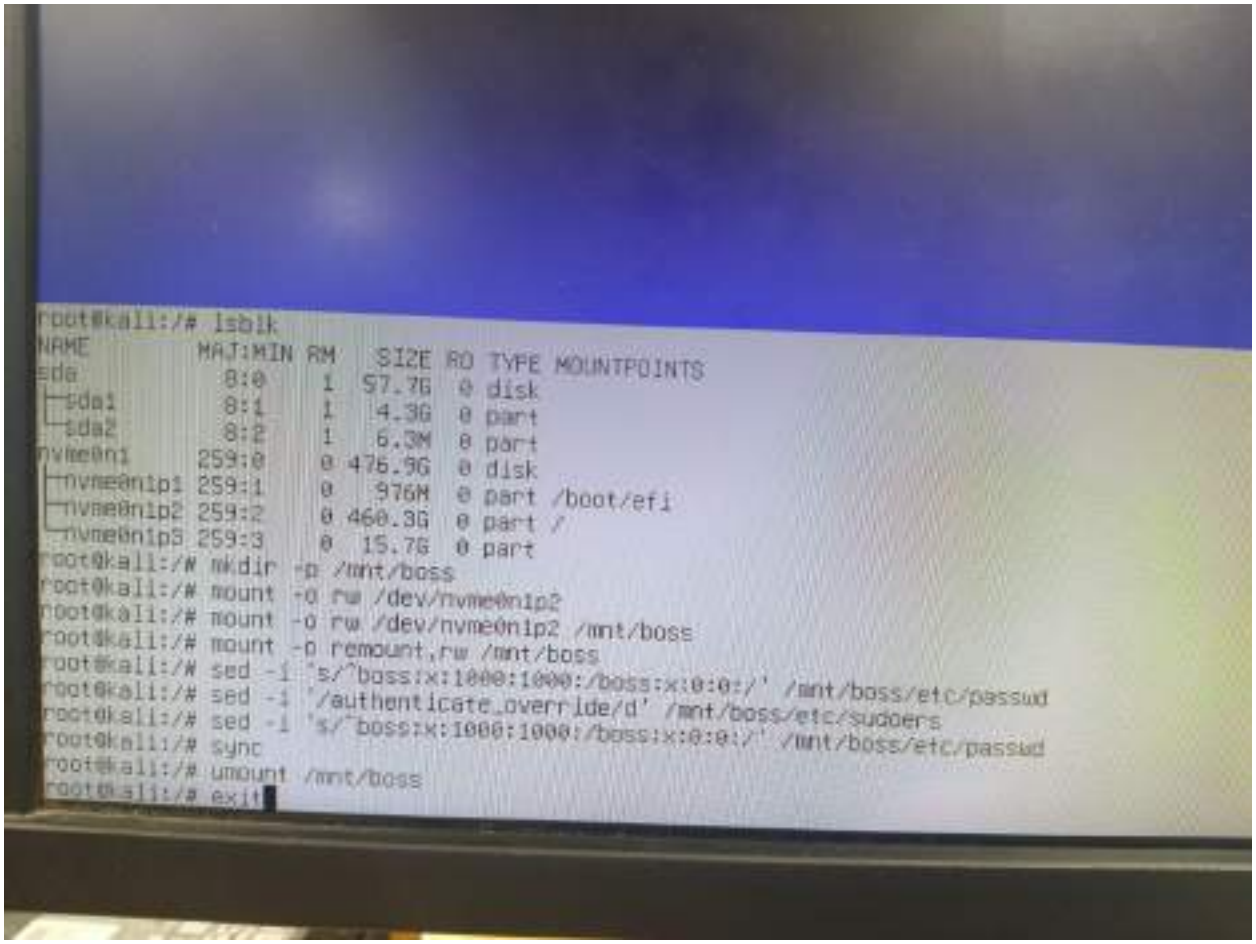

Step5 now will execute is as shell as shown in the image

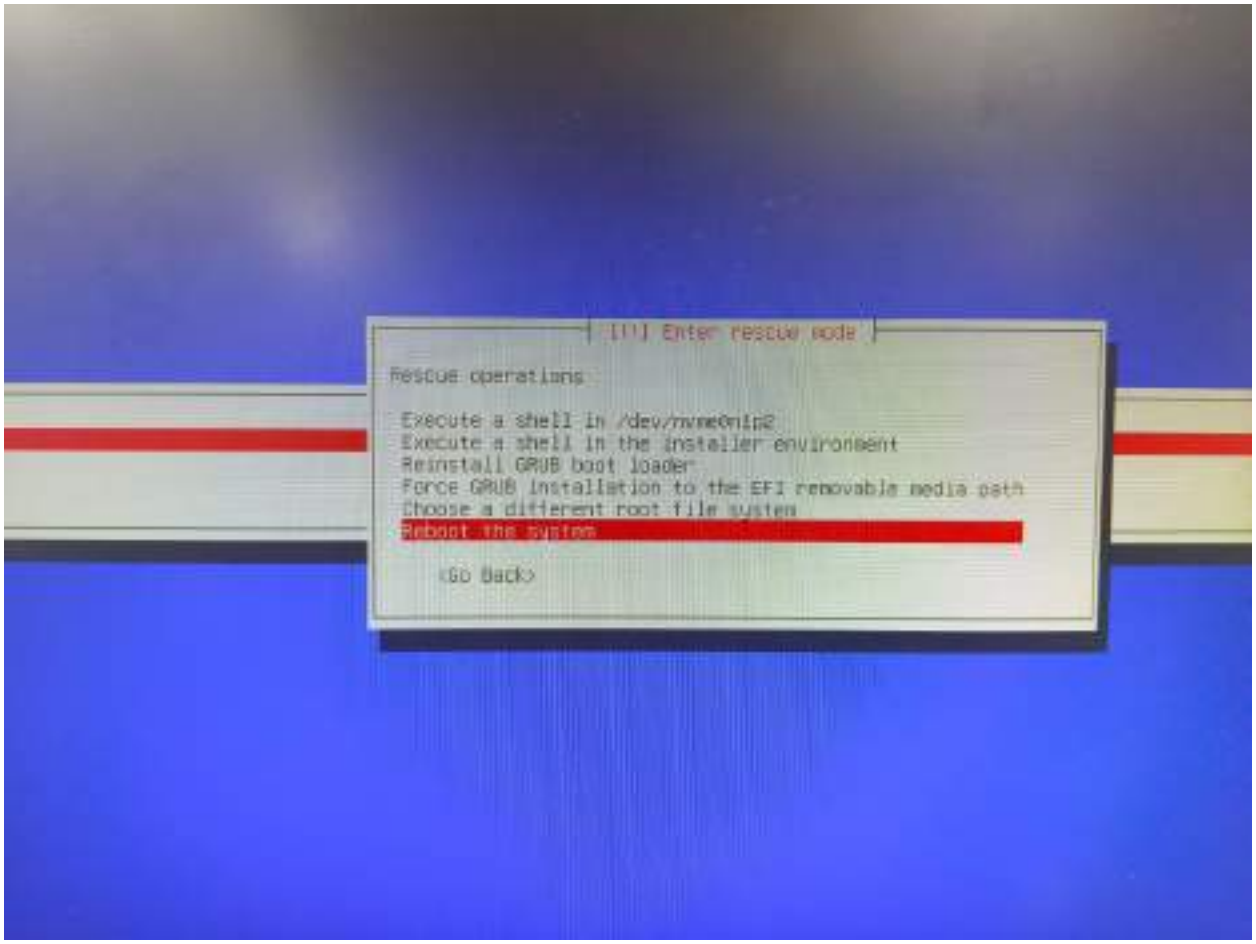

Step6 now you will able to get terminal of the Boss OS

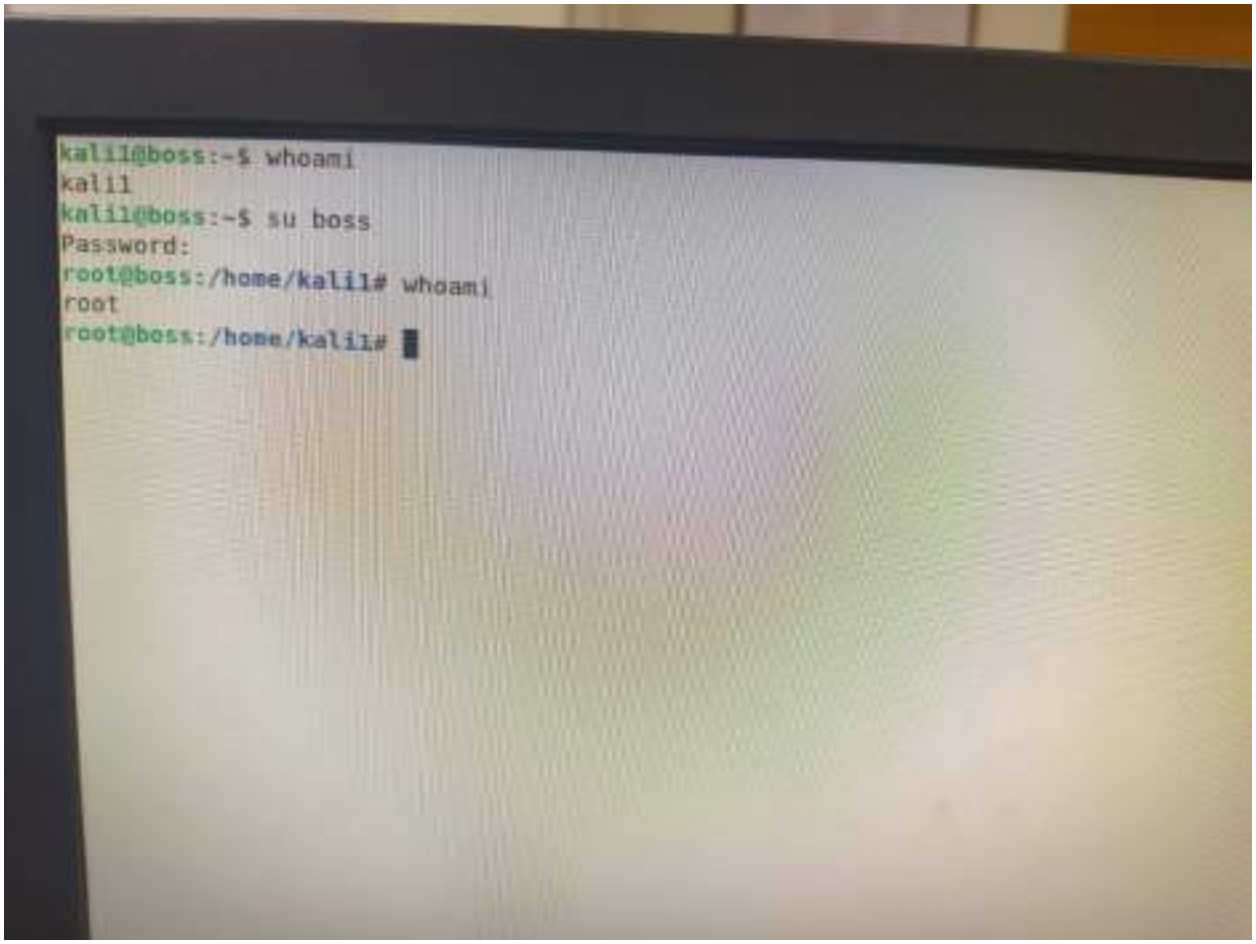

Step 7 we check the partition using lsblk then create the directory using mkdir , mount the linux boss we uid set to 0 , remove the authenticate override file

Step 8 reboot it

Step7 go on boss os system

Now We become the root user now we can access anything what we want
