File System, Permissions, and Storage

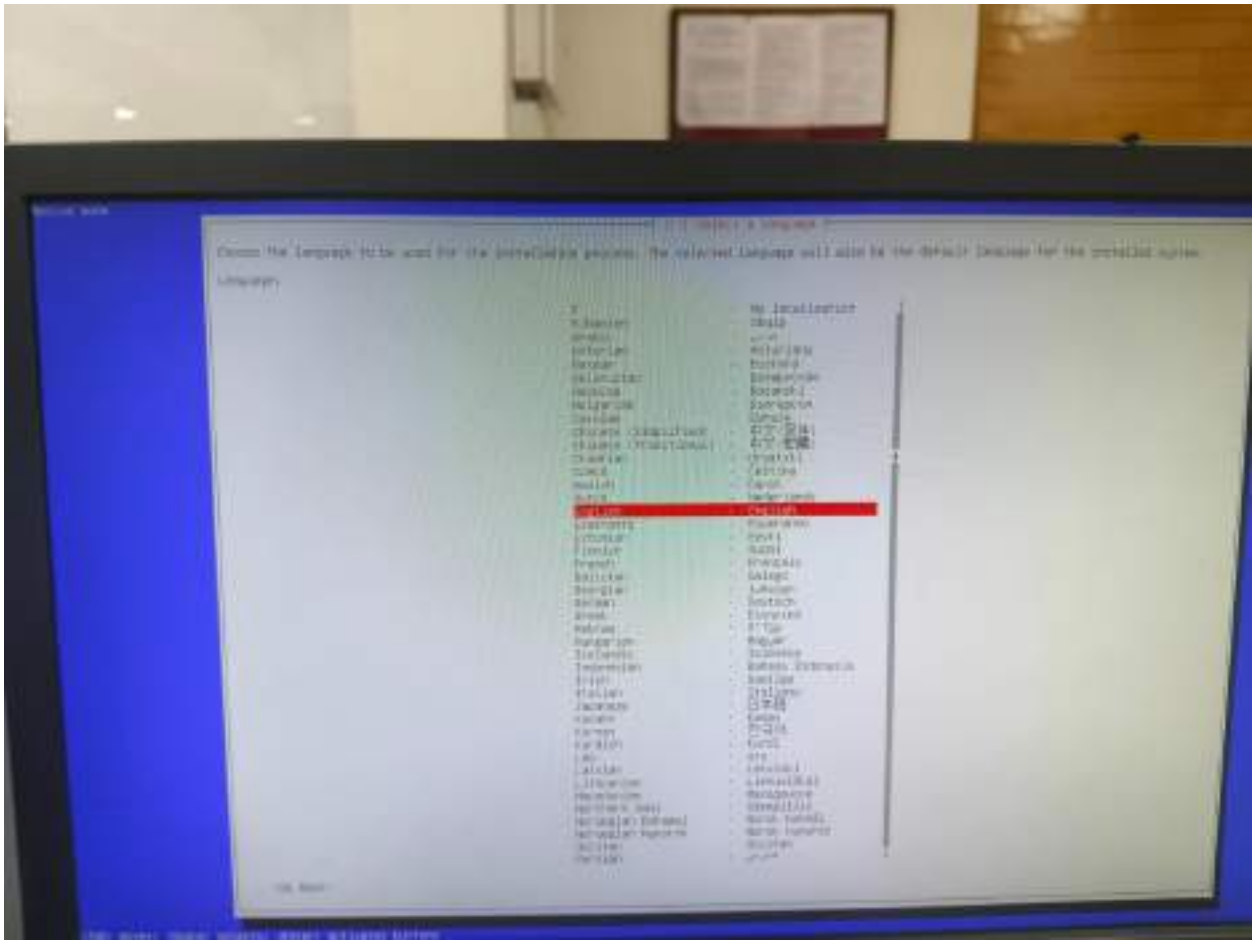

Step1 going into rescue mood of kali linux using Advance option in bootable pendrive

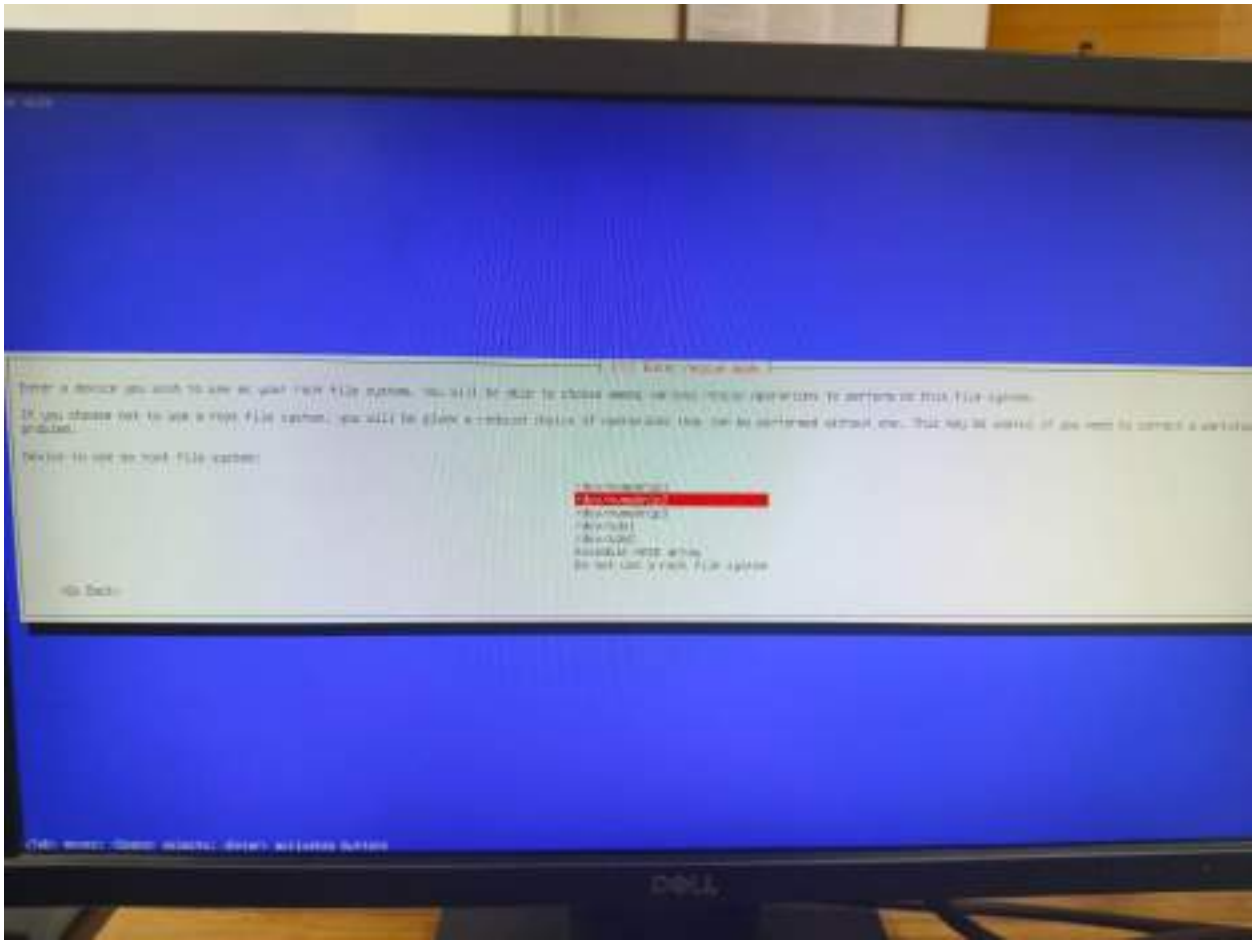

Step2 In Advance option go to the rescue mode

Step 3 Enter all the steps u do to setup just click ENTER SKIP until you enter the main rescue mode

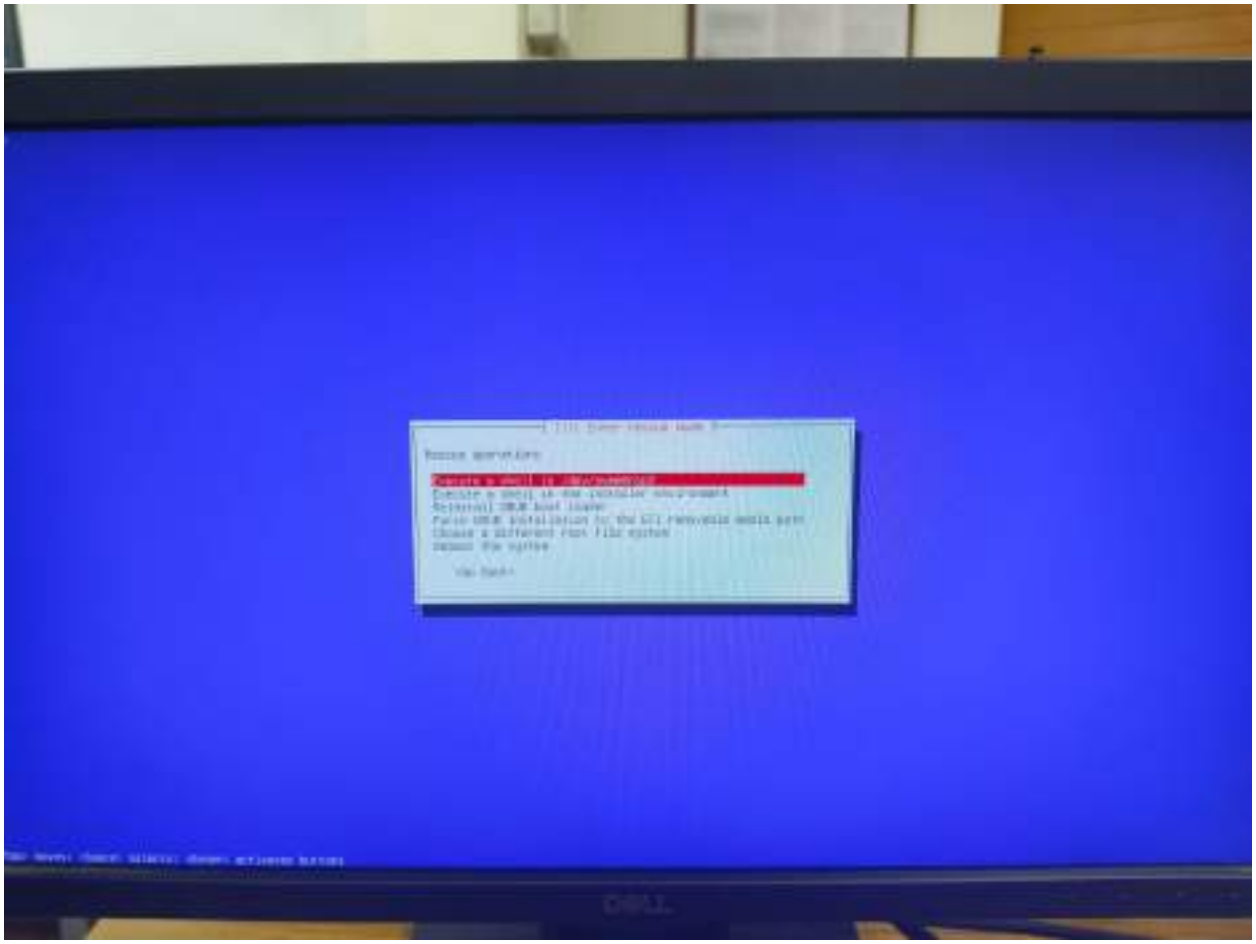

Step 4 you will see many option but choose only where the boss partition is there we will select which device to use root file system .

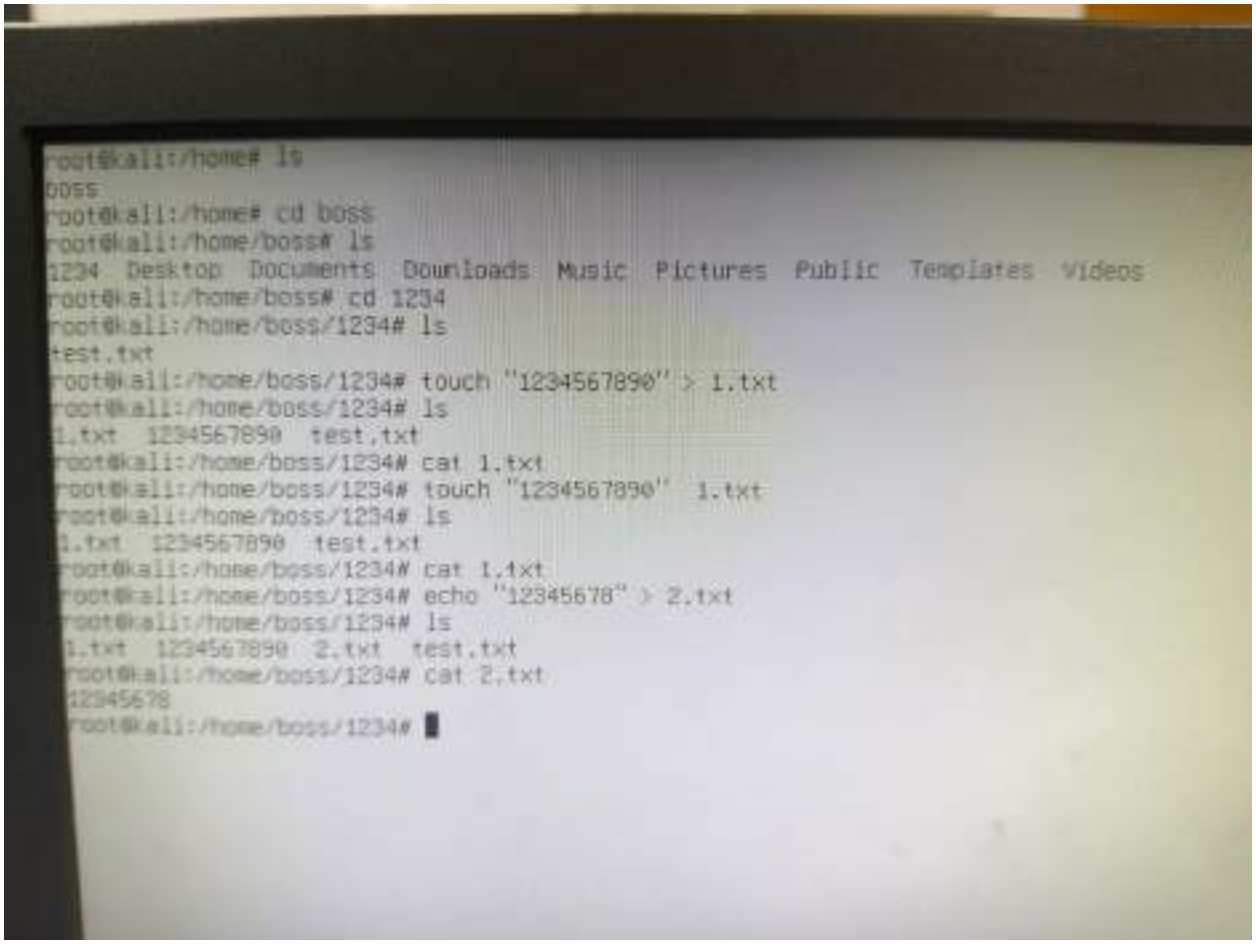

On our system we will select

Step5 now will execute is as shell as shown in the image

Step6 now you will able to get terminal of the Boss OS

Now you can see all the file and create new files and folder and also enter anything in that

root@kali:/home# ls
boss
root@kali:/home# cd boss
root@kali:/home/boss# ls
1234 Desktop Documents Downloads Music Pictures Public Templates Videos
root@kali:/home/boss# cd 1234
root@kali:/home/boss/1234# ls
test.txt
root@kali:/home/boss/1234# touch "1234567890" > 1.txt
root@kali:/home/boss/1234# ls
1.txt 1234567890 test.txt
root@kali:/home/boss/1234# cat 1.txt
root@kali:/home/boss/1234# touch "1234567890" 1.txt
root@kali:/home/boss/1234# ls
1.txt 1234567890 test.txt
root@kali:/home/boss/1234# cat 1.txt
root@kali:/home/boss/1234# echo "12345678" > 2.txt
root@kali:/home/boss/1234# ls
1.txt 1234567890 2.txt test.txt
root@kali:/home/boss/1234# cat 2.txt
12345678
root@kali:/home/boss/1234#
